

INVITATION TO COMPLETE ONLINE SURVEY

Exploring Operating Room Staff Experience Related to The Design of Operating Room Spaces in Australia.

Hello,

You are being invited to complete an online questionnaire that is expected to take a total of 15 minutes.

This research project is about understanding staff engagement and perceptions of factors that influence safety and function when designing Operating Rooms (ORs). Health providers need rigorous evidence to make decisions that affect patient and staff safety, efficiency, and function. However, evidence based guiding principles for the engagement of OR staff in the design phase does not feature in the literature. Understanding the manner in which OR staff are engaged in the design phase may lead to better coordination and collaboration in the design of OR spaces.

OR staff and OR designers are invited to participate in this study.

As you are a member of a professional perioperative staff /health care design organisation within Australia, you are being invited to participate in this survey to:

- Provide your experiences of working within an operating room to understand your involvement in designing operating room spaces and what it is like to work in the OR while caring for perioperative patients.
- Design teams are being invited discuss design planning, perceptions of safety and function and experiences with clinician engagement.

To thank you for your participation, when you complete the questionnaire, you will be directed to the optional prize draw where you will have the chance to enter a draw to win one (1) of four (4) \$100 gift cards.

The study has been approved by the Human Research Ethics Committee at the University of Adelaide; approval number H-2023-095.

Please select the survey link/scan the QR code:
